

# ISCO HDPE Golf Course System

Get 'connected' to a versatile, dependable, leak-free HDPE system – designed to deliver worry-free performance all season long!

Course designers, developers and superintendents everywhere have discovered the same thing – a durable, flexible ISCO high density polyethylene (HDPE) piping system is easy to install, easy to repair if necessary, and easy to 'tap' for system expansion.

An HDPE system actually gains strength and won't become brittle in lower temperatures, expanding and contracting to avoid cracking – even during critical spring start-ups.

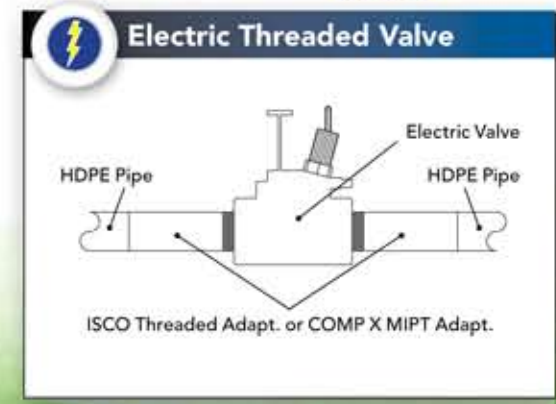

Water hammer or over pressure is no longer a problem or concern with an HDPE system.

Qualified ISCO personnel stand ready to assist in selection of proper size and class pipe for your irrigation project, and ISCO stocks – or can fabricate – any fittings required to connect with other sprinkler or pumping systems specified, as illustrated in the sample piping grid illustrated here.

Install With Confidence!

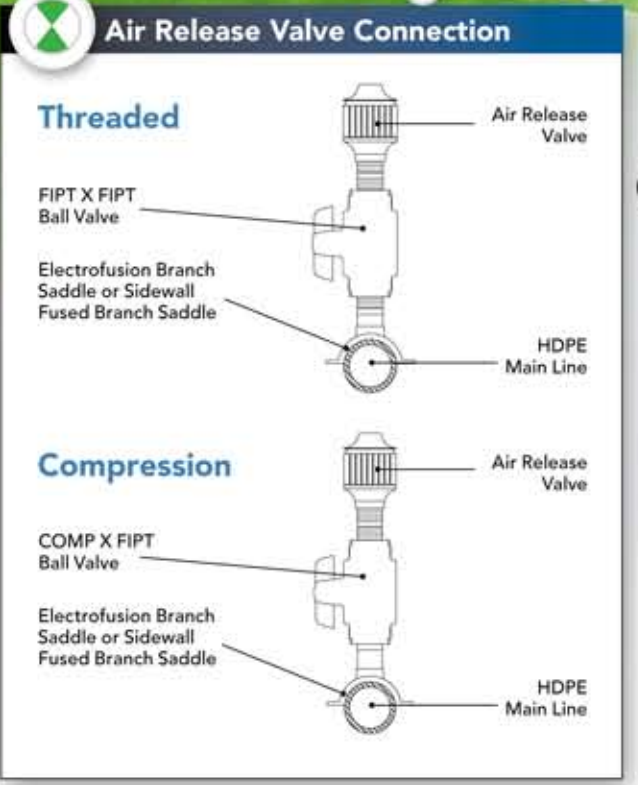

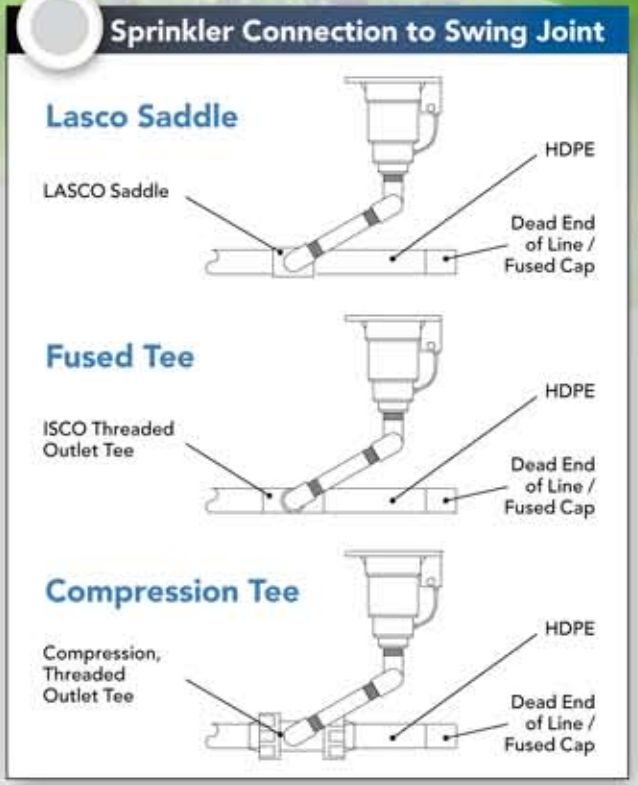

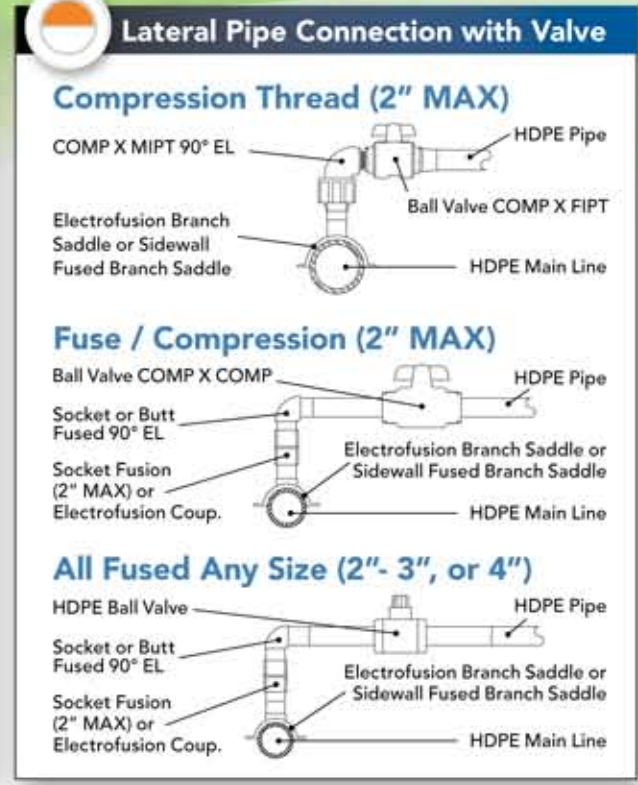

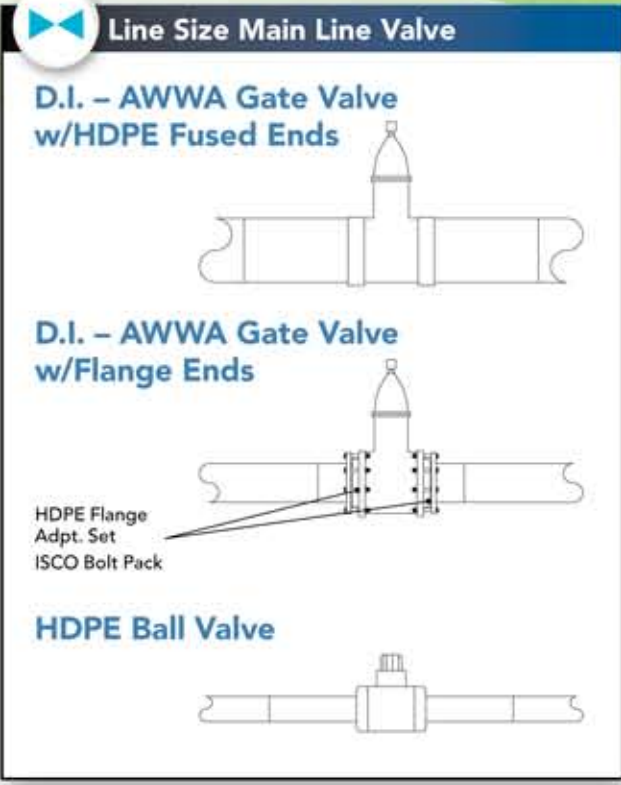

Ask about our exclusive 5-Year Limited Warranty that provides replacement of any HDPE pipe shown to be defective in materials or workmanship.

ISCO HDPE pipe is ideal for:

- Main, lateral, and pump discharge piping
- Pump station wet wells
- Pump intake piping and floats
- Wetland piping
- Creek, bridge and road crossings
- Lake/pond trickle tube

**McELROY**

ISCO Industries sells and rents fusion equipment from the industry leader – McElroy Manufacturing. Whatever the job, we have the size and model fusion equipment you need, backed by expert advice.

For ISCO HDPE pipe, irrigation pros just call 1-800-345-ISCO (4726).

Coming through.
