ISCO Industries and GIW Industries announce nationwide partnership

(LOUISVILLE) September 2008 – ISCO Industries, one of the nation's largest distributors and manufacturers of polyethylene (HDPE) piping products, and GIW, a leader in the design of high-performance slurry pumps, are pleased to announce a nationwide partnership for ISCO to become GIW's key or principal distributor for slurry pump sales into the sand and gravel business.

In March 2007 ISCO acquired Fraser Mining in Mansfield, Texas enabling them to expand into a sales model that offered better solutions for the aggregate market. Fraser was able to provide not only pipe and fittings, but a complete system solution to their customers. This sales model goes hand-in-hand with the goals ISCO and GIW both embody of providing their customers with complete solutions to their aggregate challenges.

In becoming the master distributor for this market ISCO is committed to inventorying GIW products in multiple locations strategically situated throughout the country. The locations were chosen to minimize freight costs and maximize customer service. ISCO has dedicated sales personnel who already have a thorough understanding of HDPE pipe and fittings, which are commonly used by the aggregate mining community. Additionally, GIW will continue consulting and training ISCO's sales personnel on the slurry operational issues that GIW and ISCO's' customers most often experience.

About ISCO

ISCO Industries, headquartered in Louisville, Kentucky, stocks and sells HDPE pipe, fittings and fabrications for various industrial, municipal, environmental, geothermal, golf and landfill applications throughout the United States and Canada. The company also rents, services and sells McElroy fusion equipment. ISCO has stocking locations in the states of Maryland, Colorado, Connecticut, Washington, Michigan, Alabama, Florida, Kentucky, South Carolina, Oklahoma, Texas, Wisconsin, Utah, Arizona, Nebraska, Illinois, California, Virginia, Georgia, Alberta, Canada and Brisbane, Australia – inventorying large stockpiles of pipe, usually within one day's delivery of most projects.

About GIW

GIW Industries has been designing pumps and moving slurry for over 90 years. They are not only a slurry pump manufacturer; they are in the transportation business. GIW pumps have been used to pump phosphate rock in Florida, oil sands in Canada and hundreds of different materials in between -- everywhere in the world. GIW serves industries such as mining and mineral beneficiation, industrial process, dredge, aggregate and coal preparation. GIW's latest innovation is the newly designed rubber impellers for maximum wear resistance in heavier slurries. GIW pumps & impellers – rock solid solutions.
