

ISCO Industries opens new, larger Houston area manufacturing and distribution facility

(LOUISVILLE) November 2008 – ISCO Industries, the nation’s largest distributor and supplier of polyethylene (HDPE) piping products, has announced the relocation and opening of a new manufacturing and distribution facility in Houston, Texas.

ISCO’s previous Houston facility opened in 2003 and was located in Webster, Texas.

“We recognized how much our business has grown in Texas and how a larger facility was needed to best serve our customers,” said Mark Kirchdorfer, ISCO Vice President of Operations.

The new manufacturing and distribution facility is located near Houston Hobby airport, conveniently positioned near Interstate 45 and the Beltway. This new facility triples ISCO’s HDPE custom fabrication space and doubles the shipping area. Plans are already underway to add another 6,000 square feet of office and warehouse space at this location. It sits on approximately seven acres. The facility stocks a large inventory of HDPE pipe up to 36-inch, a full line of fittings, and McElroy fusion equipment for sale or rent. FM pipe and fittings are also stocked here.

The facility supports ISCO sales representatives Mark Horton, Scott Lindsay, Hal Smith, Charles Shugart, Matt Fraser and Clint Trotter. It is staffed by plant manager Chris Rountree, expert mechanics ready to repair and refurbish McElroy equipment as well as qualified fusion technicians.

“This distribution and manufacturing facility is an excellent base from which to work and gives us more area to inventory and more resources to better serve our customers,” said ISCO President Jimmy Kirchdorfer.

“This increased presence in the Houston area, coupled with the 2007 acquisition of Fraser Mining in the Dallas/Ft. Worth area, is a testament to the rapidly growing use of HDPE in the municipal and industrial market,” he said.

The address of the new facility is 5610 Almeda Genoa Road, Houston, Texas. Mark Horton, Scott Lindsay, Hal Smith, Clint Trotter, Charles Shugart, Matt Fraser and Clint Trotter can be reached by calling toll free (800) 345-4726.

ISCO Industries, headquartered in Louisville, Kentucky, stocks and sells HDPE pipe, fittings and fabrications for various industrial, municipal, environmental, geothermal, golf and landfill applications throughout the United States and Canada. The company also rents, services and sells McElroy fusion equipment. ISCO has stocking locations in the states of Maryland, Colorado, Connecticut, Washington, Michigan, Alabama, Florida, Kentucky, South Carolina, Oklahoma, Texas, Wisconsin, Utah, Arizona, Nebraska, Illinois, California, Virginia, Georgia, Ohio, Massachusetts, Alberta, Canada and Brisbane, Australia – inventorying large stockpiles of pipe, usually within one day’s delivery of most projects.
