### **ISCO INDUSTRIES OPENS NEW LOCATION IN CHILE, PLANS OPEN HOUSE**

LOUISVILLE, KY. (APRIL 17, 2013) – ISCO Industries, a Louisville-Ky.-based pipe supplier and custom manufacturer of high-density polyethylene (HDPE) piping products, recently opened a new facility in Santiago, Chile. The company plans to host an open house at the location on April 23, 2013, from 10am to 2pm.

The new 500 square-meter facility is situated on a two-hectare lot. It houses a full line of McElroy fusion equipment and offers sales, training and repair of fusion machines.

“We looked at Chile over the last several years as a market with a lot of potential because of the increasing foreign investment, especially in the mining sector,” said Vice President of International Sales Ted Amaya. “Chile’s economy continues to grow. An ISCO Industries location in Chile positions us well to service our customers in the Latin American region.”

“Mining is the entry point, but Chile’s economy is diversified,” he said. “There are opportunities in agriculture, power, geothermal and many other areas where ISCO’s products and services, and the quality that comes with those products and services, have the capacity to play an integral part in the growth of these industries.”

The open house will include a speech from ISCO, a blessing of the facility and a showcase of ISCO’s capabilities in the region.

The address of the new location is: Panamericana Norte #20.378, Galpon 13, Lampa, Santiago, Chile. The main ISCO contact in Chile is Regional Sales Manager Sergio Sanhueza. He can be reached by phone at +56-9-68981090, or email at [sergio.sanhueza@isco-pipe.com](mailto:sergio.sanhueza@isco-pipe.com).

#### **ABOUT ISCO**

Since 1962, ISCO Industries, a global customized piping solutions provider headquartered in Louisville, Ky., stocks and sells a wide variety of HDPE pipe, piping materials, and offers custom HDPE fabrication to provide piping solutions for multiple applications such as: industrial, municipal, power, oil and gas, mining, environmental, geothermal, golf, culvert-lining and landfill. The company also rents, services and sells McElroy fusion equipment. ISCO has more than 30 facilities in North America, Australia and Chile – inventorying large stockpiles of HDPE pipe and piping products, usually within a one day delivery of most projects. For more information on ISCO, visit [www.isco-pipe.com](http://www.isco-pipe.com) or call 1-800-345-ISCO.
